

## 2 DAY JAVA FUNDAMENTALS COURSE

We recognise that it's difficult to take an entire department away from their duties for a week, but most companies can survive with a 2 day outage of key staff. On this course we ask the client to tell us which modules they require from the activities below. The price of this 2 day on-site Java fundamentals course for up to 8 people is £1500 + VAT.

This 2 day course provides students with the necessary knowledge and skills to create Java programs.

The course curriculum covers the following:

Module 1 - Introduction to Java Technology (intro to object orientated programming).

Module 2 - Problem Analysis and Design in Java.

Module 3 - Developing Java Programs.

Module 4 - Using variables in Java.

Module 5 - Using objects in Java.

Module 6 - Conditional Constructs in Java.

Module 7 - Java Looping Constructs

Module 8 - Developing methods in Java.

Module 9 - Constructors and Encapsulation.

Module 10 - Java Arrays.

Module 11 - Java Inheritance - super and subclasses.

**Please call Vince Stevenson on 07731-876304 for further details of this Solaris Fundamentals Course or email [vince@bdv-unix-skills.co.uk](mailto:vince@bdv-unix-skills.co.uk).**
